INTRODUCTION

DUNES CAPITAL INITIATIVE

MAF is the flagship brand of Dunes Capital Initiative, one of the leading business conglomerates in the United Arab Emirates, that comes with a wide spectrum of business segments. The important brands under the DCI umbrella include:

- MAF Fire Safety & Security L.L.C
- MAF Gas L.L.C
- MAF Trading L.L.C
- MAF MEP LLC

MAF FIRE SAFETY & SECURITY L.L.C

MAF Fire Safety & Security LLC is a leading name in the fire & safety industry, based out of the UAE. Right from manufacture and supply of fire fighting equipment's, to installing the most advanced fire combating utilities in buildings, MAF takes care of all your requirements, when it comes to high-profile safety from the hazards of fire.

Founded in the year 2012, in the global city of Dubai, MAF offers turnkey solutions to an elite clientele that cuts across various business and social segments. MAF is a UAE based business conglomerate that ventures into a diversified range of service segments.

THE PROJECT

We're passionate about what we do. All those small, yet crucial tasks involved in the designing of a complete fire fighting system excites us. Thus, we would be more than happy to assist you right from the conception stage of a project. This gives you an added advantage of having the benefit to avail our expertise right from stage 1, so that your dream project will have a fire detection and fire fighting setup of the highest standards.

ANNUAL MAINTENANCE CONTRACT.

Having problems with your existing fire fighting and fire alarm systems? Worry not!

We can be of help by serving you with an Annual Maintenance Contract (AMC). You can avail our services any day and any time for an AMC, with the assurance of quick response and responsibility. As a part of the AMC, we take over your existing system and closely monitor all crucial elements including fire detection and alarm systems, fire fighting systems, emergency lighting & central battery systems and deluge systems among others.

As a part of the AMC, we also help our clients with the necessary documentation, clearances and periodic certifications that are required as part of compliance to local rules and regulations.

FITOUTS

As a service dedicated to all kinds of business segments, we offer specialized services for smaller spaces such as fit-outs, that operate as a part of a larger structure. This is crucial because during an emergency, it is easier to spring into action and keep the space danger-free.

RECTIFICATION

Building up a tamper-proof fire safety system is an expert task. Even the minutest of error would augment itself into a grave situation, rapidly. So, remain safe by correcting any flaw that occurs in your existing system with our exclusive rectification services.

MAF GAS L.L.C

With a vision to venture into diverse business portfolios, MAF has also entered into the LPG, NG and SNG Systems installation and support service sector. We have proved our expertise in the development, production and distribution of cutting-edge technologies for the safe and efficient use of LPG, NG and SNG systems.

Right from consulting and design, to testing and maintaining, MAF Gas is all equipped with a dedicated team of engineers and professionals, ready to take on projects of all scopes and scales. Whether a new project or an existing one, we have customized design solutions to cater to the requirements of all kinds of structures including residential, commercial, industrials, hotels, malls, villas etc.

The Activities

- Projects
- Annual Maintenance Contract
- Fit out

Some of our products and services include:

Central Gas System

- Residential
- Commercial
- Industrial

Installation and Annual Maintenance

Specialized pipeline & fittings installation

- LPG/NG/SNG Pipeline
- Industrial Gases Pipeline
- Fuel tank pipeline
- Medical Gas pipeline

LPG Vaporizer

Control Valves and Regulators

Gas Flow Meters

Gas Solenoid Valves

Pressure Vessel Fittings

Gas Detection Systems

Gas Tank Level Monitoring System

Industrial Gas Detection Systems

MAF TRADING L.L.C

All the products in the MAF portfolio have received international acclaim and recognition. They are most trusted by all our customers too. Sometimes even our best of customers come seeking our products to replace some of their existing brands for reasons. As a brand, committed to provide extended service to all our customers, we make sure that they get what they need.

We deal with fire and safety products of many other brands, presenting our customers with a wide array of value-for-money options.

MAF MEP LLC

MAF MEP LLC is a professionally managed organization. It has built its reputation by introducing innovative state of art technologies in concept, development, design, planning, scheduling and execution of projects. We are undertaking Construction RCC Projects, Industrial Steel Fabrication & Erection Projects, Electro-mechanical projects and Interior Fit-Out Projects. Company has assigned qualified and well-experienced expertise to ensure the successful results of our projects. Company intention is to build up business relation with our clients based on reliable execution of projects within the specified schedule.

MAF MEP LLC carries out general construction concept, design, planning, implementation and execution of diversified projects on a turnkey basis for electrical and mechanical installation, operation and maintenance of commercial and industrial buildings, warehouses etc.

MAF MEP LLC prides itself in its reputation as a business built around people offering excellence and an assured quality product which is second to none, with a commitment for the highest technical and managerial abilities and prioritized safety, incorporating state-of-the-art technology in modern and traditional construction.

MESSAGE FROM OUR CHAIRMAN

It is with great pleasure that I introduce MAF FIRE SAFETY & SECURITY L.L.C. In the present world, the word “safety” has high relevance; hence we have proudly renewed our motto to “a safer world.”

Our dedicated organization provides high-quality services in engineering, installation and maintenance to our customers across the UAE. Our extensive services include Fire alarm systems, Security systems, Emergency Lighting systems and all types of Fire Fighting systems. In our drive towards perfection and uncompromising quality we are constantly looking forward to building long-term customer relationship. The commitment and sincerity of our team is an integral factor of our success and reflects in every project we undertake. These values have seen us earn the trust of customers, suppliers and contractors. Eventually it is giving our customers true satisfaction – a factor that gives us pride and joy.

As the Chairman, I feel delighted to work with such a highly motivated and talented team. Hope this energy will reflect in every step we take towards the future.

I seek the wholehearted support of each of our patrons and hope that the rapport between us will continue to be bright, so that we could all grow together and make the world a better place to live in.

Chairman
Mr. Majid Obaid Juma Bin
Majid Al Falasi

CMD's MESSAGE – DUNES CAPITAL

It was in 2008 that I had an opportunity to give life to Dunes Capital Initiative. This was a result of my ambition and dream to create stunning and landmark structures. Since then, we have been in the forefront of building homes and structures, remaining completely committed to the society that we are a part of.

It all began with the launch of MAZ Consultants, a full-service consulting and engineering firm that offers public multi-disciplined expertise and comprehensive services. Once the foundation was set with the instant success of MAZ, Dunes Capital initiative was founded, and it soon becomes the mother company of all our initiatives.

Under the umbrella of Dunes Capital Initiative, we slowly moved towards other business verticals, on a mission to serve a wider ambit of requirements. MAF Fire Safety & Security was founded soon and it quickly developed into one of the most sought-after brands for fire & safety in the region. Gradually, Dunes Capital Initiative ventured into various sectors including Gas, Trading, Food sector, Retail sector, Property Development and MEP (Mechanical, Electrical and Plumbing) solutions.

At Dunes Capital Initiative, each project begins with an extensive dialogue with the client, so that we understand their requirements comprehensively. Our high-quality and cost-effective services include exploring multiple options to arrive at the best possible solutions. We specialize in civil engineering, architectural design, structural design, the design of fire fighting & fire alarm systems, building services design and project management services. We undertake commercial, industrial, residential land development, renovation, and conservation projects for Government, Corporations, and private owners. Our high-quality and cost-effective services include exploring multiple options to arrive at the best possible solutions.

We devote unmatched dedication to every single project of ours, irrespective of its size. Our services extend to research work, feasibility studies, case studies, preparation of tender drawings and documents, liaising with approving authorities, planning approval as well as construction supervision, start-up operation, project management, energy audit and management, professional management, and advisory services.

We look forward to your continued support and trust.

CMD Dunes Capital

Ar. Sulaiman Vayalath

B.Arch, F.I.I.A, Principle Architect

CEO's MESSAGE

Success is by no means an accident, but a result of continuous hard work, improvisation and yearning for the best. At MAF Fire Safety & Security, this pursuit for hard work is not simply a driving force, but also a routine practice strictly adhered by every single member of the group. That is exactly why MAF is one of the leading Fire & Safety brands in the UAE, that is greatly reputed and looked up by all our customers.

Ever since our inception in 2012, MAF has been growing steadily as a popular name in the sector. Despite stiff competition in the market, we have managed to make it to the top of the table through constant innovation of technology and introduction of new products and services. Thanks to our highly skilled and professional workforce, MAF has been successful in serving our customers with the best. Now, on a mission to serve a wider customer base, MAF is intending to reach out to other Emirates and even beyond. We hope to make our presence strong in the international market and make a global impact profoundly.

As the CEO, I am highly delighted to be a part of Team MAF and sincerely hope that the brand continues to grow higher in the months and years to come.

CEO

Mrs. Jasmin Sulaiman

MAF Fire Safety & Security

MAF FIRE SAFETY & SECURITY L.L.C

BUSINESS SEGMENTS

Now, as we celebrate our 5th anniversary, we are looking at larger prospects of expansion with new operations within the UAE, as well as other GCC countries including Oman, Qatar, Kuwait and Saudi Arabia. As an enterprise committed to customer welfare, we will soon be introducing more innovative and state-of-the-art products, with the pledge of prompt, round-the-clock service.

MAF Fire Safety & Security is one of the few companies in Dubai that has successfully secured DCD A+ category license. What is even more commendable, is the fact that we have gained this distinction within just 5 years of our inception, a feat so very laudable considering the fact that all other companies were able to manage it only after 10 years of operations.

PROJECT - A MISSION SO PROMISING!

MAF Fire Safety and Security LLC proud to say that, we have grown into what we are today because of our highly valued clients. Empowering them with the platinum value for their trust on us, we work according to their specific requirements, no matter the magnitude or scope of the task. We are passionate about what we do. All those little, yet crucial tasks involved in the designing of a complete fire system excites us. Thus, we would be happier to assist you right from the conceptual design stage of a project. This gives you an added advantage of having the benefit to avail our expertise right from stage one, so that your dream project will have a fire detection and protection setup of superlative standards.

The Design

We prepare the design drawings, which are to be submitted for approval based on the standards/specifications. MAF team design engineers who are proficient in typical fire protection system layouts.

As with the bids, the owner's engineering representative should thoroughly review the design drawings and flow calculations for technical compliance with the specifications. Final documents shall be submitted to the Civil defence (Local Authority for Jurisdiction) for approval after clearance from owner's representative.

Many contractors are not aware of the NFPA standards for specialized designs, such as turbine/generator protection, flammable liquids (storage/handling) and LPG tanks. In such cases, our expertise is available and can be used for the preparation of design drawings. The owner should then go-to-market for a bid for the installation based on our concept design drawings.

The Installation

Only after acceptance/approval has been obtained in writing from all review agencies, installation should begin. The failure to do so could result in major changes to the system that has already been installed. The installer would likely pass those additional costs to the owner. Fire safety practices should be in place during

installation, including good housekeeping and the proper supervision of hot and cold works. The owner's representative should make periodic progress inspections to check for non-conformance issues and good work practices.

Acceptance Evaluation

Acceptance evaluation of installed fire protection systems includes design and installation verification as well as acceptance testing. A final "walk-down" of the installation by an experienced fire protection specialist ensures that the systems is installed as per final approved design.

The specialist checks to make sure that no unauthorized or non-conforming changes have been made during the installation and that any field changes have been approved. The final verification includes all equipment and supporting devices which include functional tests of the components to prove the integrity of the complete fire detection and protection system.

Acceptance Testing

Even though fire protection systems cannot be tested under actual operating conditions, several steps need to be completed before a system can be considered as reliable and proper. Acceptance testing refers to the non-destructive tests that can be performed to assess the system's ability to meet the established performance criteria.

For water-based systems, this includes pipe flushing and hydrostatic tests, full trip testing of actuating valves and testing of all associated alarms. For gaseous fire suppression systems, this includes a complete operational (trip) test and the release of agent for carbon dioxide and clean agent fire suppression systems. A door fan test (Integrity Test) should be performed to assess the "tightness" of the protected space. Integrated system tests ensure that Fire suppression and detection systems working effectively.

ANNUAL MAINTENANCE CONTRACT.

Having problems with your existing fire fighting and fire alarm systems? Worry not!

We can help you by serving you with an Annual Maintenance Contract (AMC). You can avail our services 24/7/365 with the assurance of quick response and responsibility. As part of the AMC, we take over your existing system and closely monitor all crucial elements including Fire fighting, Fire detection and alarm, Emergency Lighting, Voice Evacuation and Gas suppression system. As part of the AMC, we also help our clients with the necessary documentation, clearances and periodic certifications that are required for compliance to local laws and regulations.

MAF comprises of a group of trained individuals, who make sure that all your life-saving products are working optimally. They do this through regular checks and updating all your devices. A quarterly report is sent to you so that you know the status of your system. All in all, MAF make sure that your equipment is ready to perform when you need it the most.

Why only authorized AMC

At MAF, we are manufacturing life-saving devices with passion and precision. We are best equipped to maintain them. Therefore, the law dictates that all fire and life safety equipment, must be serviced and maintained only by authorized personnel.

MAF AMC Package

MAF technical team has qualified, skilled and factory trained engineers & technicians who perform Quarterly Service Schedule for AMC customers to ensure that every equipment in the client's premises is ready to use and always working optimally.

BEFITTING FOR FIT OUT

As a service dedicated to all kinds of business segments, we offer specialized services for smaller spaces such as fit-outs, that operate as a part of a larger structure. This is crucial because, during an emergency, it is easier to spring into action and keep the space danger-free. Fit-outs start from the pre-approval by the licensing authority to plan your space and ends with the OC (occupancy certificate) and ready to move-in for your potential clients. We realize that time is money, so we always commit and follow through under all time constraints. All our projects are executed with our own in-house fit-out teams.

There are many regulations to adhere to when redefining an existing space of a structure/building. In order to comply with fire safety regulations, MAF team will work with you to provide advanced information about the fit-out jobs as per Civil Defence rules and regulations.

FOOL-PROOF RECTIFICATION

Building up a tamper-proof fire safety system is an expert task. Even the minutest of error would augment itself into a grave situation, rapidly. So, we have a 'check-up' system, for those who do not have AMC, which includes call-out maintenance, servicing and also, the replacement of fixtures, if required. We help you remain safe by correcting any flaw that occurs in your existing system with our exclusive rectification services. We offer you high-end rectification services so that you remain safe, by correcting any flaws that occur in your existing system and be doubly assured.

One of the most important elements of a commercial fit-out is the correct installation and maintenance of Fire and Safety Services. This involves qualified service specialists and is subject to strict regulations. These regulations are issued by the NFPA and Dubai Civil Defence includes Standards of Performance as well as the Standards of Maintenance. It is expected that as a client, you know and understand the responsibilities with regards to fire and safety at the commercial premises.

The client will do so by engaging a preferred Fire and Safety Services company to provide technical expertise and carry out installation as part of the overall fit out. The location and number of Fire sprinklers, installation of Emergency Warning, Inter-communication System, provision of Smoke Detectors, Manual call points and sounders are just some of the critical aspects of this work. The Fire and Safety technicians will ensure that all work is carried out in strict accordance with regulations and that the safety of those working within or near the premises is assured at all times.

APPLICATIONS

We offer products and solutions for a wide range of industries. With 5+ years of experience we have been able to develop unique fire-fighting solutions for many applications. These are some of the major and critical applications where our solutions are commonly used.

RESIDENTIAL & COMMERCIAL BUILDINGS, HOTELS & RESTAURANTS

The common type of fire fighting systems used in the buildings is automatic wet pipe sprinkler systems. In case of fire, the alarm valves act as check valves and give an alarm. The alarm is usually through the water gong audible alarm bell or through the signal from pressure or flow switch and the fire detection system and alarm system (since these systems are interfaced, as per local laws/regulations).

Pre-action alarm systems which have two signals in order to start water flow through a sprinkler system. It is especially of great use in the case of a false alarm or a mechanical failure. This is recommended in areas where sprinklers are necessary only in case of actual fire, so there is no water damage to any expensive assets in the building, due to inadvertent opening of sprinklers.

OIL, GAS & PETROCHEMICAL

Deluge water spray system for cooling of storage tanks, bullets, spheres, structures and flammable liquid storage areas. Fixed foam system for open top floating and fixed roof flammable liquid storage tanks. Foam bladder tank systems provide accurate, dependable, and cost-effective foam fire protection for a variety of flammable/combustible hazard areas, with no external power other than water pressure. Water is applied to the outside surface of the bladder, displacing foam the concentrate inside the bladder, which then is injected into the water stream. Deluge or compressed foam system for Generator room, Air craft Hangers and flammable liquid storage and handling areas. Custom engineered foam systems are ideal for foam proportioning applications for a range of foam discharge. The different range of Water/Foam monitors are used in petrochemical storage and refineries

MANUFACTURING PLANTS

The danger of Fire is critical in areas of manufacturing like paint booths, flammable liquid and paint storage areas, packing areas comprising of corrugated boxes, woods, boiler/ switchgear/ generator rooms, exhaust ducts, quench tanks, etc. In such places, fire detection and medium velocity water spray systems are used. Deluge or compressed foam systems are also commonly used in flammable liquid storage and handling areas. Custom engineered foam systems are used in special hazard areas.

POWER PLANTS

Deluge water spray system is commonly used in protecting places with steam gas and turbo generators, operating at high temperature and speed, containing a large quantity of lubricating oil that involve major risk of fire. For protecting any fixed hazards such as transformers, circuit breakers, diesel engines and diesel storage tanks, turbo alternators, lube oil systems, oil filled boilers; high-velocity water nozzle spray is used. Fire detection and medium velocity water spray systems are used in coal conveyor systems.

IRON AND STEEL INDUSTRIES

Iron and steel furnaces and heating chambers involve much fire hazards. The fixed water and foam fire protection system is able to quickly extinguish or suppress the fire and protect the surroundings until relevant personnel have full control of the situation.

AVIATION INDUSTRY AND AIRPORTS

Hangers – where aircraft are kept, are areas of potential risks keeping in mind the significant quantity of flammable liquid, etc. are present. Foam-water deluge systems, with supplementary protection like low-expansion foam discharge system using water powered oscillating monitors, are used in such places. Another option is a combination of automatic sprinkler protection and an automatic low-expansion foam system.

MARINE INDUSTRY

Taking into account the potential danger in terms of loss of lives and damage to cargo, fire hazard could be serious and crucial in vessels. We have a range of cast bronze monitors and aluminum bronze nozzles to nickel aluminum bronze deluge valves. They are the robust, rugged and very dependable type of fire-fighting products that are suitable for the marine type of environment.

PORTS AND TERMINALS

Foam –water sprinkler systems are the commonly used in high and medium risk areas in ports and docks like fertilizers, biomass, wooden boxes, chemicals, flammable liquids areas, etc. There are even other various portable foam discharge devices like mobile foam units, trailer mounted monitors are used in terminals.

METRO RAILWAYS

The fire characteristics in a metro tunnel are unique, different from those in buildings. The main fire load in a metro tunnel is the train itself and there is likelihood for the fire to spread along the cabin cars due to the effects of fire in the confined space. Unlike building fires, a train may still be in motion within a tunnel and the air in the tunnel may also be flowing due to the operation of the mechanical ventilation system. The consideration of fire safety in rail and in tramps, it has been increasing over recent years at a rapid rate. There are many steps of the requirement for fire protection that must be followed by metro rail operators. All systems including passenger compartments, electrical systems and switch cabinets pose lots of considerations for fire protection system during installation. With rail tunnel development booming worldwide, fire protection and safety measures have come to the forefront once again. With key technologies such as reaction-to-fire properties of rolling stock, fixed gas suppression systems, improved fire detection systems including video-based automatic incident detection systems and the automatic deployment of preset emergency plans, the industry tries to minimize the danger of tunnel fires.

SPECIAL PROJECTS

In addition to the design and manufacture of standard fire-fighting products, we can also provide customized and bespoke engineered systems to meet individual customer needs or applications for special projects. Special units and skids are made on demand according to your specifications. Our technical service and engineering teams can assist you on special project requirements for various fire-protection and related applications from initial conceptual design to commissioning and on-site assistance.

VISION AND MISSION

Our vision is to be recognized as the most trusted and reliable manufacturer and provider of industry standard and quality fire security products and services to our customers worldwide, that leverage advanced technology and performance, with value pricing and thereby achieving complete customer satisfaction. We work with a firm commitment to excel in all our operations by abiding to the fire safety principles, thus the trust that the people have in us, is truly what ignites us to excel.

We're proud to say that we have grown into what we are today because of our very special patrons – our clients. Empowering them with the platinum value for their trust on us, we work according to their specific requirements, no matter the magnitude or scope of the task. We offer various range of products required for any hazardous situations, even if it is a medium or high-risk application globally. Our post installation services like AMC and Rectification ensures that we aim only to safeguard the worldwide community from any kind of minutes.

We are persevering with hard work and conviction that our long-term strategies will have a positive impact on all those associated with us.

OUR VISION AND MISSION STATEMENTS

OUR CORE VALUES

Credibility

We keep our promises and meet our commitments. The courage to remain truthful ensures fairness in all our relationships.

Pride in our Employees

Our teams are the core of our business and ensure our future success. We must create a future together by nurturing and developing our staff.

People and Environment

We are fully committed to ensure an injury free workplace, where everybody goes home safe. Respect for people means to care for them and to protect the environment in which we live and work.

Customer Orientation

We commit ourselves to a long-term partnership focused on creating value and for our clients. Client satisfaction is achieved through the high quality of our teams and the services we provide.

Trust

We build relationships with clients, employees and consultants, on a foundation of trust and respect. We operate an open book approach with our clients and our goal is to develop long term relationships with our clients and become your partner of choice.

QUALITY ASSURANCE

The world around us has changed and continues to change, rapidly. In an increasingly uncertain world, MAF is increasingly certain about its responsibility as designers, engineers and managers of the build environment.

QUALITY POLICY

In order to create a better tomorrow MAF aims to:

- Meet the needs of its clients by providing services of recognized value.
- Seek continued enhancement of its performance through improved processes.
- Create continued where people of high ability are attracted to work in the firm.
- Achieve local delivery of the firm’s global knowledge and skills, supported by appropriate training and facilities.
- Maintain honour and mutual respect in relationships with clients, members of the firm and collaborators.

24X7 ASSISTANT

MAF comes to you with the exclusive advantage of round the clock service, every single day of the year. What we have in our kit, is a wide array of services that include Fire Fighting systems, Fire Alarm systems, Emergency Lighting systems, Gas installation and maintenance and Trading.

800 FIRE [800 3473]

HSE POLICY

HEALTH, SAFETY & ENVIRONMENTAL (HSE) POLICY We, at MAF, are committed to provide safe & healthy workplace and to take adequate measures to prevent Environmental pollution for its activities & services, so far as reasonably practical. To prevent any untoward incident / accident and ill-health to all employees, contractors and other stakeholders, MAF Top management recognizes HSE management as one of the top priorities for sustainable organizational growth.

To achieve this the company will, Incorporate HSE consideration in all its business decisions and operations of the organization, Promote awareness among its employees & contractors to develop a positive HSE culture, Provide information; impart training & instruction to its employees and contractors to ensure HSE requirements at job-sites including emergency & crisis management maintain equipment, office & job - site condition through optimal utilization of resource that minimize or eliminate occupational Health Safety & Environmental risk. Ensure contractors/suppliers are meeting the Project’s health and safety standards, optimize waste generation and encourage resource conservation and/or recycling, offer energy efficient/renewable energy solutions to the client where possible periodically review health and safety performance of the organization by business heads and ensure corrective actions are initiated. We believe, communication, consultation & collaboration with all employees and stakeholders and accountability at different level, shall uphold the principles of this policy.

All employees shall support the implementation of this management policy through – using the safety equipment issued to them, familiarizing them with the safety rules/procedures of the organization and by enforcing appropriate corrective measures, if violations are reported at site. The company with the coordination of all employees will endeavor for continual improvement in implementing HSE management & performance. MAF implemented this policy, in combination with Safety, Health Regulations, standards and codes of practice of our customers, in accordance with the applicable statutory requirements.

CSR POLICY

The initiatives put forward by MAF Fire Safety & Security LLC in Corporate Social Responsibility aims at imparting complete benefits to the society. It includes expanding organizational ethical codes, effective participation of employees and launching new programs and initiatives by holding company culture. CSR mainly presents its impression through charitable, philanthropic, environmental and volunteer based categories. It can also be the ultimate development process that includes effective participation of both public and private sectors. CSR has become a quite important facet of a private company's hierarchy that must be integrated to its mission and vision.

MAF Fire and Safety LLC.'s mission reflects its ethical codes and values in a way that are beneficial to the entire society. Our yearly goals consist of events and awareness campaigns to provide knowledge about the important issues and to enlighten people's lives.

We set goals to achieve social, voluntary, humane and charitable activities to benefit society and continuously evaluate them to develop to reach as many people.

MAF Fire and Safety LLC. Continuously engages in initiatives to make the world a better place to live in safely. We also focus on recognizing small time entrepreneurs with innovative ideas and concepts. Also, we coordinate with local organizations with its

Effective developmental and humanitarian investments and contribute in an effective manner. Our CSR implementation strategy will definitely make us a part in the development of the country with vision, environmental, human and voluntary goals, event calendars and we make partners with local entities that have similar goals.

CSR ACTIVITIES

The initiatives put forward by MAF in Corporate Social Responsibility aims at imparting complete benefits to the society. It includes expanding organizational ethical codes, effective participation of employees and launching new programs and initiatives by holding company culture. CSR mainly presents its impression through charitable, philanthropic, environmental and volunteer based categories. It can also be the ultimate development process that includes effective participation of both public and private sectors.

CSR has become a quite important facet of a private company's hierarchy that must be integrated to its mission and vision.

OUR TEAM

Our team members are our greatest asset.

Our ability to deliver outstanding results for our clients starts with our team of smart, capable PR experts. The team comes from a diverse set of experiences and backgrounds that range from various sectors. As unique as we are individually, we share a mutual passion for technology and doing excellent work for our clients and partners. We pride ourselves on our strategic, integrated approach to public relations and the results it delivers.

Get to know your MAF team below.

A CLIENTELE SO CONTENTED

At MAF, we are certain that the core goal of our business is the smile of a happy customer. Needless to say, our efforts to keep our clients smiling have won us continued patronage from them. We have been proud to associate with some of these big names who have set benchmarks in their own industry segments. We have already accomplished a few milestones in our trail to growth. Have a look at some of our completed projects that speak loud on the quality of our products and services:
